

LATROBE VALLEY FOOD  
SECURITY COALITION  
COLLECTIVE IMPACT REPORT  
2022

Food For All Latrobe Valley is a collaborative initiative.

The Food For All Latrobe Valley logo is a representation of the collaborative actions of many passionate community members and the following organisations:

An Initiative of the Latrobe Health Innovation Zone.

# Latrobe Valley Food Security Coalition

Aim: Sustainable access & availability to fresh, nutritious food for our community

**4**

Years working in collaboration

**140+**

Membership base

**91%**

of the Latrobe Valley population exposed to key messaging

**20%**

of the Latrobe Valley population participating in interventions

**88**

organisations, community groups and schools engaged

**392**

food interventions delivered

# Executive Summary

Food security can be defined as 'when all people, at all times, have physical and economic access to sufficient, safe and nutritious food that meets their dietary needs and food preferences for an active and healthy life'.<sup>1</sup>

Data released through the Victorian Population Health Survey found that 6.6% of the population within Latrobe Valley experience food insecurity with hunger.<sup>2</sup> This is significantly higher than the Victorian average of just 3.6%.<sup>2</sup>

In response to this growing issue a local Food Security Coalition, known as Food For All Latrobe Valley (FFALV), was established to increase access to fresh nutritious food across Latrobe Valley. The Coalition is an initiative of the Latrobe Health Innovation Zone, and is supported by the Latrobe Health Assembly, Latrobe Community Health Service and many other organisations and community members.

Food For All Latrobe Valley aims to strengthen local partnerships and work collaboratively to support local organisations, community groups and community members to deliver effective, place-based solutions to address this complex issue.

The Coalition has been in operation since 2018 and to date has achieved the following collective impacts:

- Four years of collaboration
- 88 organisations, community groups and schools engaged
- 392 interventions delivered
- 17,359 people participating in interventions
- 91% estimated population reach of interventions and FFALV food messaging

This report provides an overview of Food For All Latrobe Valley's achievements over the last four years, and presents the project outcomes that have been achieved in the last 12 months (July 2021 - June 2022).

# Introduction

Food security can be defined as ‘when all people, at all times, have physical and economic access to sufficient, safe and nutritious food that meets their dietary needs and food preferences for an active and healthy life’.<sup>1</sup>

In contrast, food insecurity is when people don’t have consistent access to the food they need to live. Food insecurity can be caused by many different factors including; lack of access to fresh food, or running out of food and not being able to afford to buy more. People can also be classed as food insecure when they don’t have the right skills to prepare food or facilities to store food items.

Data released through the Victorian Population Health Survey found that 6.6% of the Latrobe Valley population experience food insecurity with hunger; meaning that they have limited access to safe, nutritious foods or availability is irregular.<sup>2</sup>

This is significantly higher than the Victorian state average of just 3.6%.<sup>2</sup> Therefore, we sought to understand what local factors may be contributing to this difference in food security rates, and how can this figure be reduced to improve the health and wellbeing of the Latrobe Valley community.

In response to increasing rates of food insecurity throughout Latrobe Valley, a community-led Food Security Coalition was formed. The Food Security Coalition, known as Food For All Latrobe Valley (FFALV), is an initiative of the Latrobe Health Innovation Zone (LHIZ) and the Latrobe Health Assembly (LHA), and is facilitated by Latrobe Community Health Service (LCHS).

# The Food Security Coalition

The Food Security Coalition was officially launched in October 2018. As food security is a very complex issue, the Coalition recognises that no single intervention or organisation will be able to successfully address the problem on their own. Therefore, this network works collaboratively across multiple groups and individuals to ensure the actions are varied to meet the needs of different people across Latrobe. With this understanding, the Coalition was developed by community members, community groups, food producers, retailers, health services, and local government to ensure the actions were community owned and led.

## AIMS AND OBJECTIVES

The Coalition aims to increase access to and availability and consumption of, fresh, nutritious food for those who live, work and play in the Latrobe Valley. The key objectives of the Coalition include:

1. Improve access to, and efficiency of food relief services across Latrobe Valley
2. Increase healthy food preferences and food literacy skills within Latrobe Valley
3. Support local food production and a sustainable food economy
4. Improve community engagement and support capacity building initiatives

## FRAMEWORK

The Food Security Coalition represents an overarching framework (Figure 1) that aims to support action at all levels from the provision of emergency food relief, to community led activities and strategic policy and planning outcomes. By approaching food security from all of these different levels we can effectively implement a broad range of interventions and support a positive shift in the local food system. The aim of this framework is to create mutually reinforcing activities to build resilience and capacity to address food insecurity at all levels impacting on the food system.

Figure 1. Food Security Coalition Overview

## PLANNING - FOOD FOR ALL LATROBE VALLEY

The FFALV initiative was established using co-design principles. This involved working with local government, industry and the local community to define the issue of food security within Latrobe and then collaboratively working towards identifying solutions. The first stage of this planning process consisted of two food security mapping workshops, where representatives from the community and multiple sectors came together and engaged in a number of Systems Thinking activities. These activities involved analysing the various factors affecting the access to and availability of fresh, nutritious food for people living and working in the Latrobe Valley. Understanding and visually mapping the complex relationships and behaviours surrounding food from diverse perspectives, living situations, knowledge and experiences, provided a solid foundation to focus our actions. The group then brainstormed project ideas to begin implementing positive change within the system.

A Brains Trust Working Group was established to bring together a small group of key players within the Latrobe Valley food security space to provide strategic advice and feedback during the initial development of the Coalition and to further develop the FFALV network.

Our work was further informed by conducting a food security survey which provided additional information on household food purchasing and consumption behaviour, and household food security rates within the specific survey area conducted in Moe, Vic. The food security survey identified that a significant number of households struggle to purchase enough food and are regularly having to ration food, or are skipping meals as they do not have enough money to purchase more. A large number of households are also experiencing ongoing stress or concern about running out of food; particularly residents holding either a pension card, healthcare card (or both), families with children, and older residents. This research remains ongoing, providing the ability to monitor local food security trends over time. A link to the 2020 report can found on page 29 of this report.

In response to the Systems Thinking mapping workshops, local food security research and extended community consultation, the initial action plan was developed. From this, three additional annual action plans have been developed and implemented (July 2019-June 2020, July 2020-June 2021, and July 2021-June 2022). The action plans include a range of community initiatives, with the fourth and final action plan (July 2022-December 2022) currently in progress.

## IMPLEMENTATION

FFALV is striving to raise greater awareness of food security and build our community's capacity to respond to this issue. FFALV recognises that no single project or organisation has the ability to provide the solution to this complex social problem. FFALV aims to incorporate a range of strategies and ideas developed together with the community to align projects with the local context for a place based approach toward food security. The initiative promotes collaboration and partnerships between passionate community members, community groups, local food retailers and food producers, along with health organisations and local government to deliver a multi-strategy approach to food security.

FFALV was officially launched in October 2018 through the Food For Thought' event which aimed to start a conversation about food, raise the profile of food security, and increase awareness of the Coalition throughout the wider community.

FFALV currently comprises over 140 members, with a core group of approximately 10 active members representing diverse sectors and community groups. FFALV is working to increase the value and consumption of fresh, local and healthy food to improve overall health and wellbeing throughout our community; with the vision of "working together to provide sustainable access and availability to fresh, nutritious food for all members of our community". FFALV members meet bi-monthly throughout the year to share knowledge, hear from guest presenters on supporting local food systems, and discuss our current actions and new ideas.

FFALV project funding is due to cease at the end of the year (December 2022). Latrobe Community Health Service will continue to support a number of our actions and discussions are underway to identify key stakeholders to take on this important work and continue to support a strong and resilient local food system within Latrobe.

## EMERGENCY RELIEF NETWORK OF LATROBE CITY

In order to work collaboratively across the food system and ensure that our work is both relevant and effective, Food For All Latrobe Valley works in partnership with the Emergency Relief Network of Latrobe City (ERNLAC). The Network was established in 2008 and offers emergency relief agencies an opportunity to regularly meet and discuss current services available in addition to the opportunities and challenges faced by the sector; providing agencies with updated local information that they can then share with their colleagues and clients. The Network provides considerable food relief resources to the Latrobe Valley community and acknowledges that the complexity of reducing dependence on these services and supporting capacity building processes to assist those experiencing disadvantage requires a collaborative, multi-agency approach.

## STRATEGIC PLANNING WORKING GROUP

The Strategic Planning Working Group (SPWG) remains under discussion at this stage. The purpose of the SPWG is to provide strategic advice on policy and planning matters that impact the local food system. The Working Group would provide a food security lens for policy makers across a broad range of local government departments to support mutually reinforcing agendas to collectively strengthen the positive influence that local government policies and procedure can have on food security. Due to the COVID-19 pandemic and the funding timeline constraints this working group was not able to be progressed during 2021-2022.

## **PRIORITY POPULATION**

Anyone living within the Latrobe City Local Government Area, with a focus on those most at risk of experiencing food insecurity.

## **SETTING**

The Coalition incorporates a whole of community approach. This includes a strong focus on place based interventions where the people of Latrobe Valley live, work, learn and play.

## **SYSTEMS THINKING**

Systems Thinking tools were utilised to develop a food security map to both understand and communicate the complexities of the food system and factors leading to high food insecurity rates for the Latrobe community (Figure 2). Two community workshops were facilitated by Deakin University with expert facilitators from The Global Obesity Centre. A number of key themes were identified:

- Food Access & Knowledge
- Food Norms & Culture
- Income & Basic Needs
- Agencies & Services
- Readiness & Support for Employment

The food security map was used to inform our work with the community to date and continues to be incorporated into the annual action plans.

**HOW WE ARE CHANGING THE SYSTEM**

This map provides an example of how some of the key FFALV actions align to the needs of the Latrobe Food System.

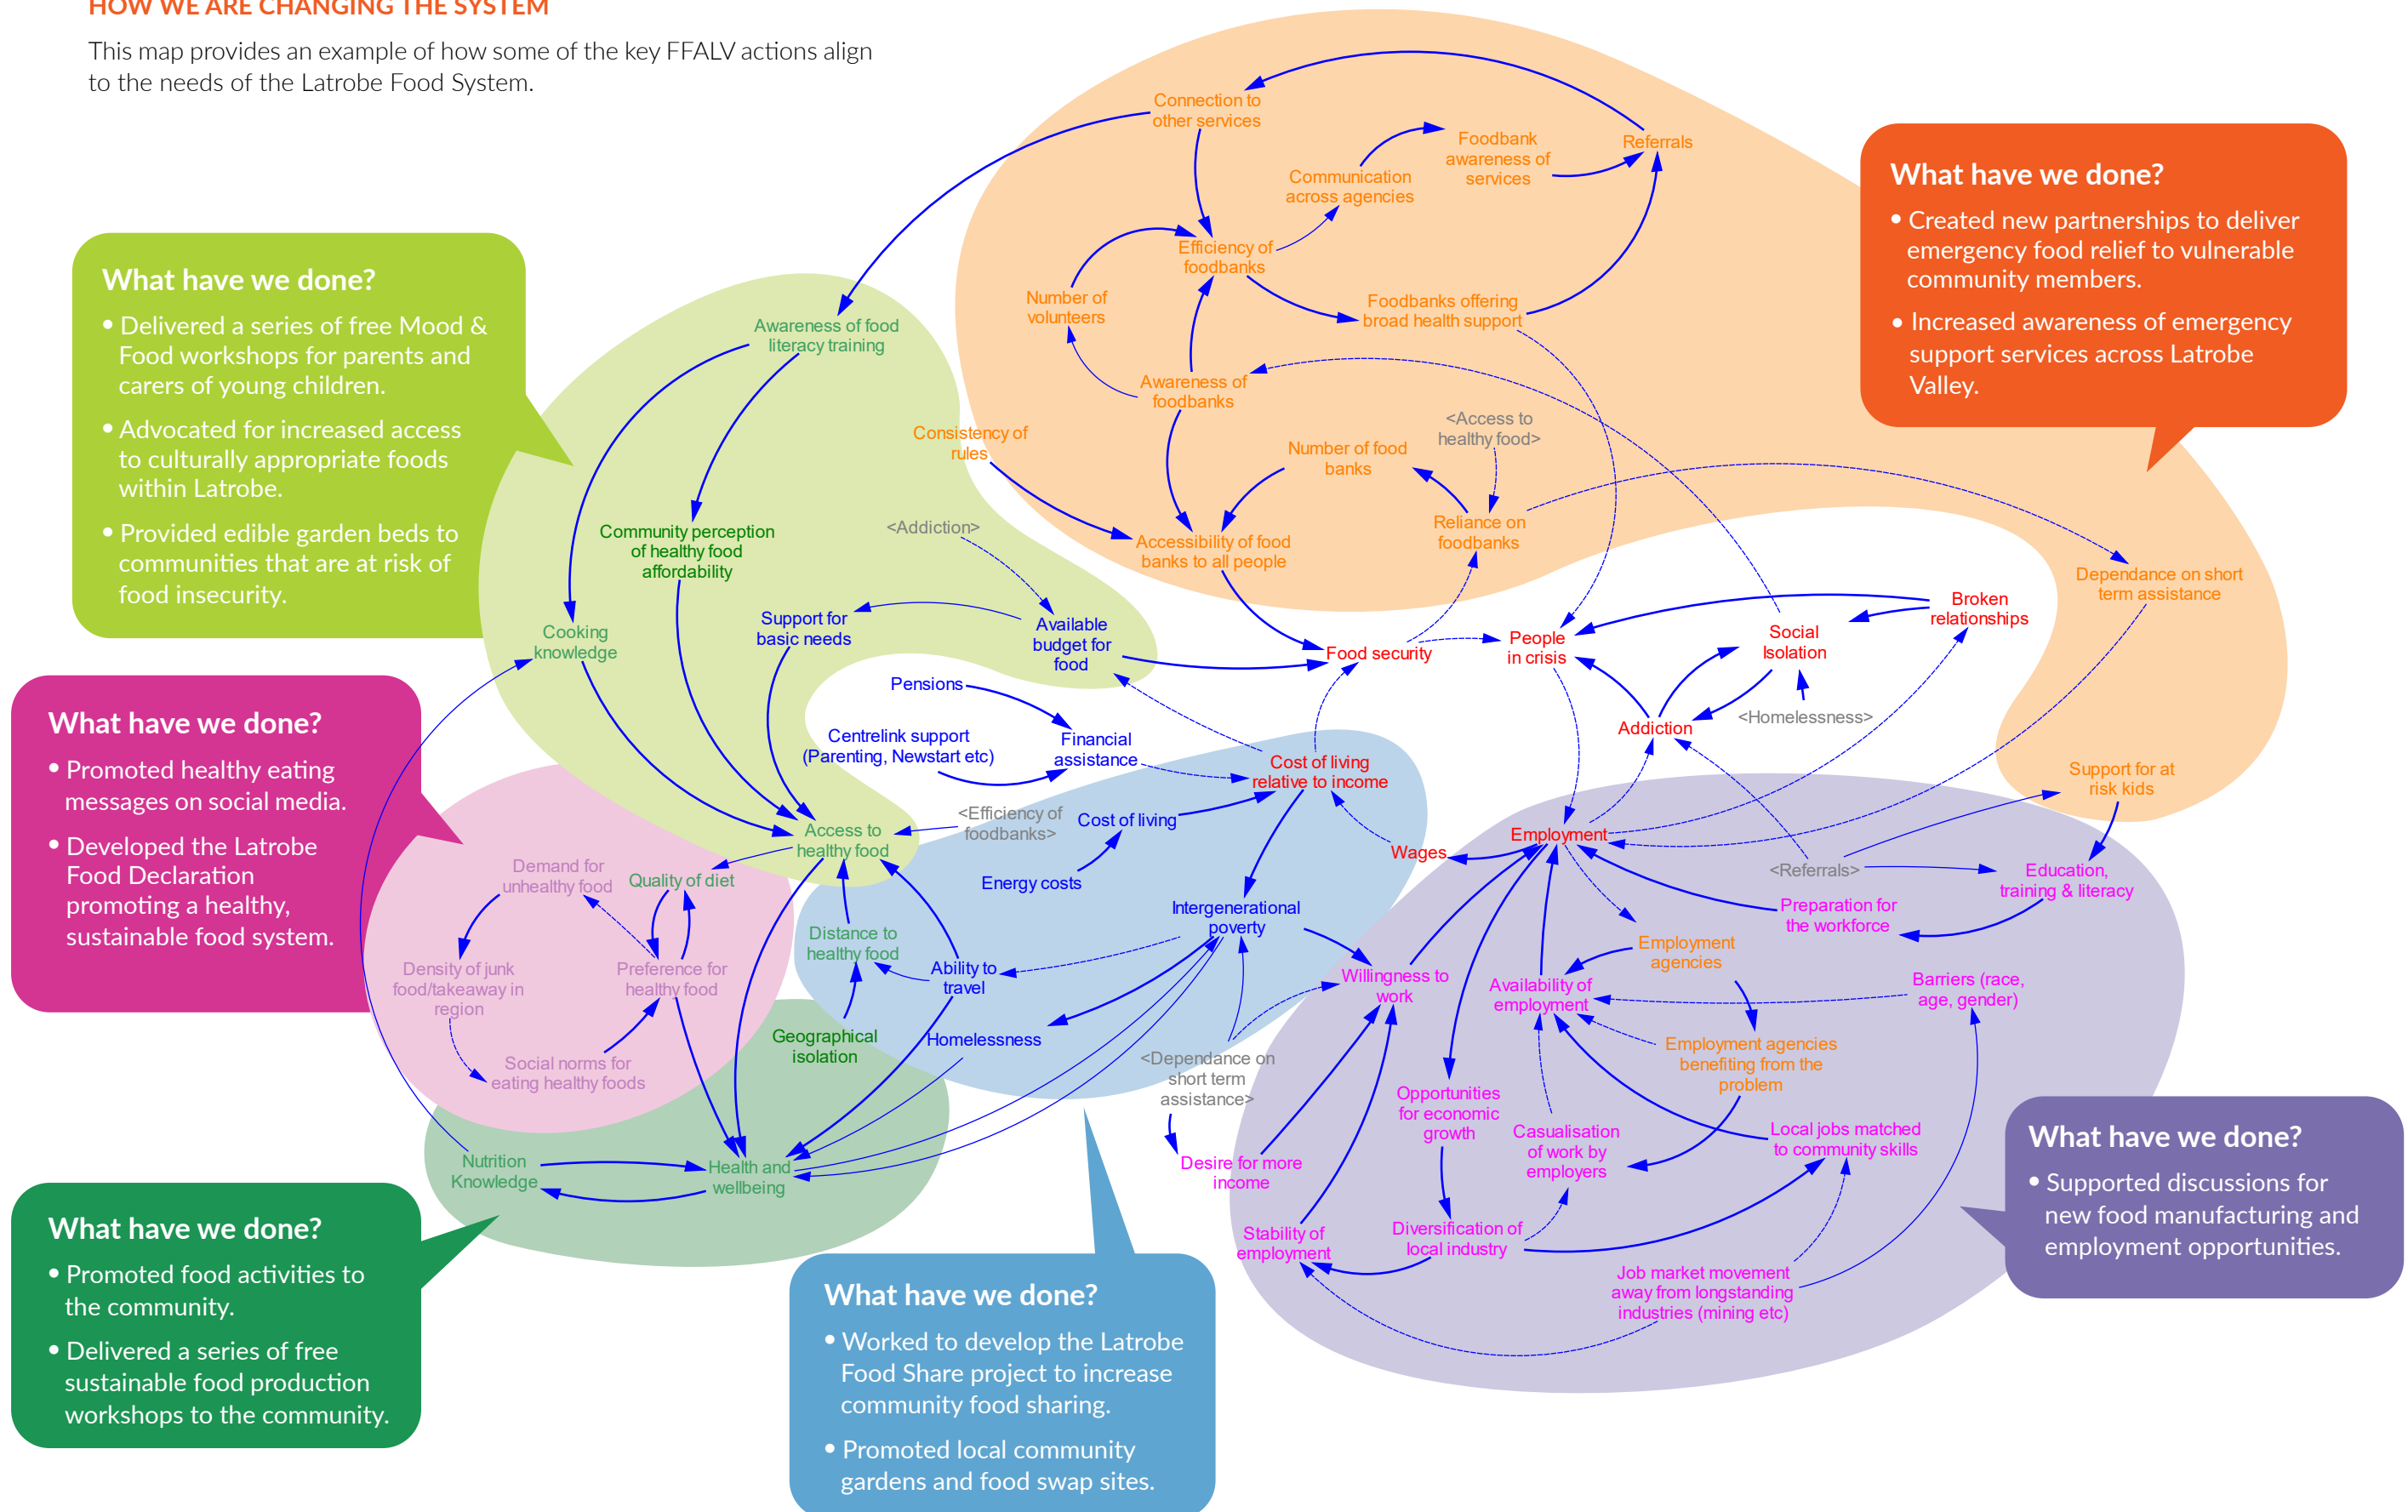

Figure 3: Food Security Map showing examples of areas of change

Systems Thinking mapping was also applied to better understand why people choose to regularly consume sugar sweetened beverages (SSB) (Figure 4). From these two workshops, 6 key areas were identified and will be used to guide future projects.

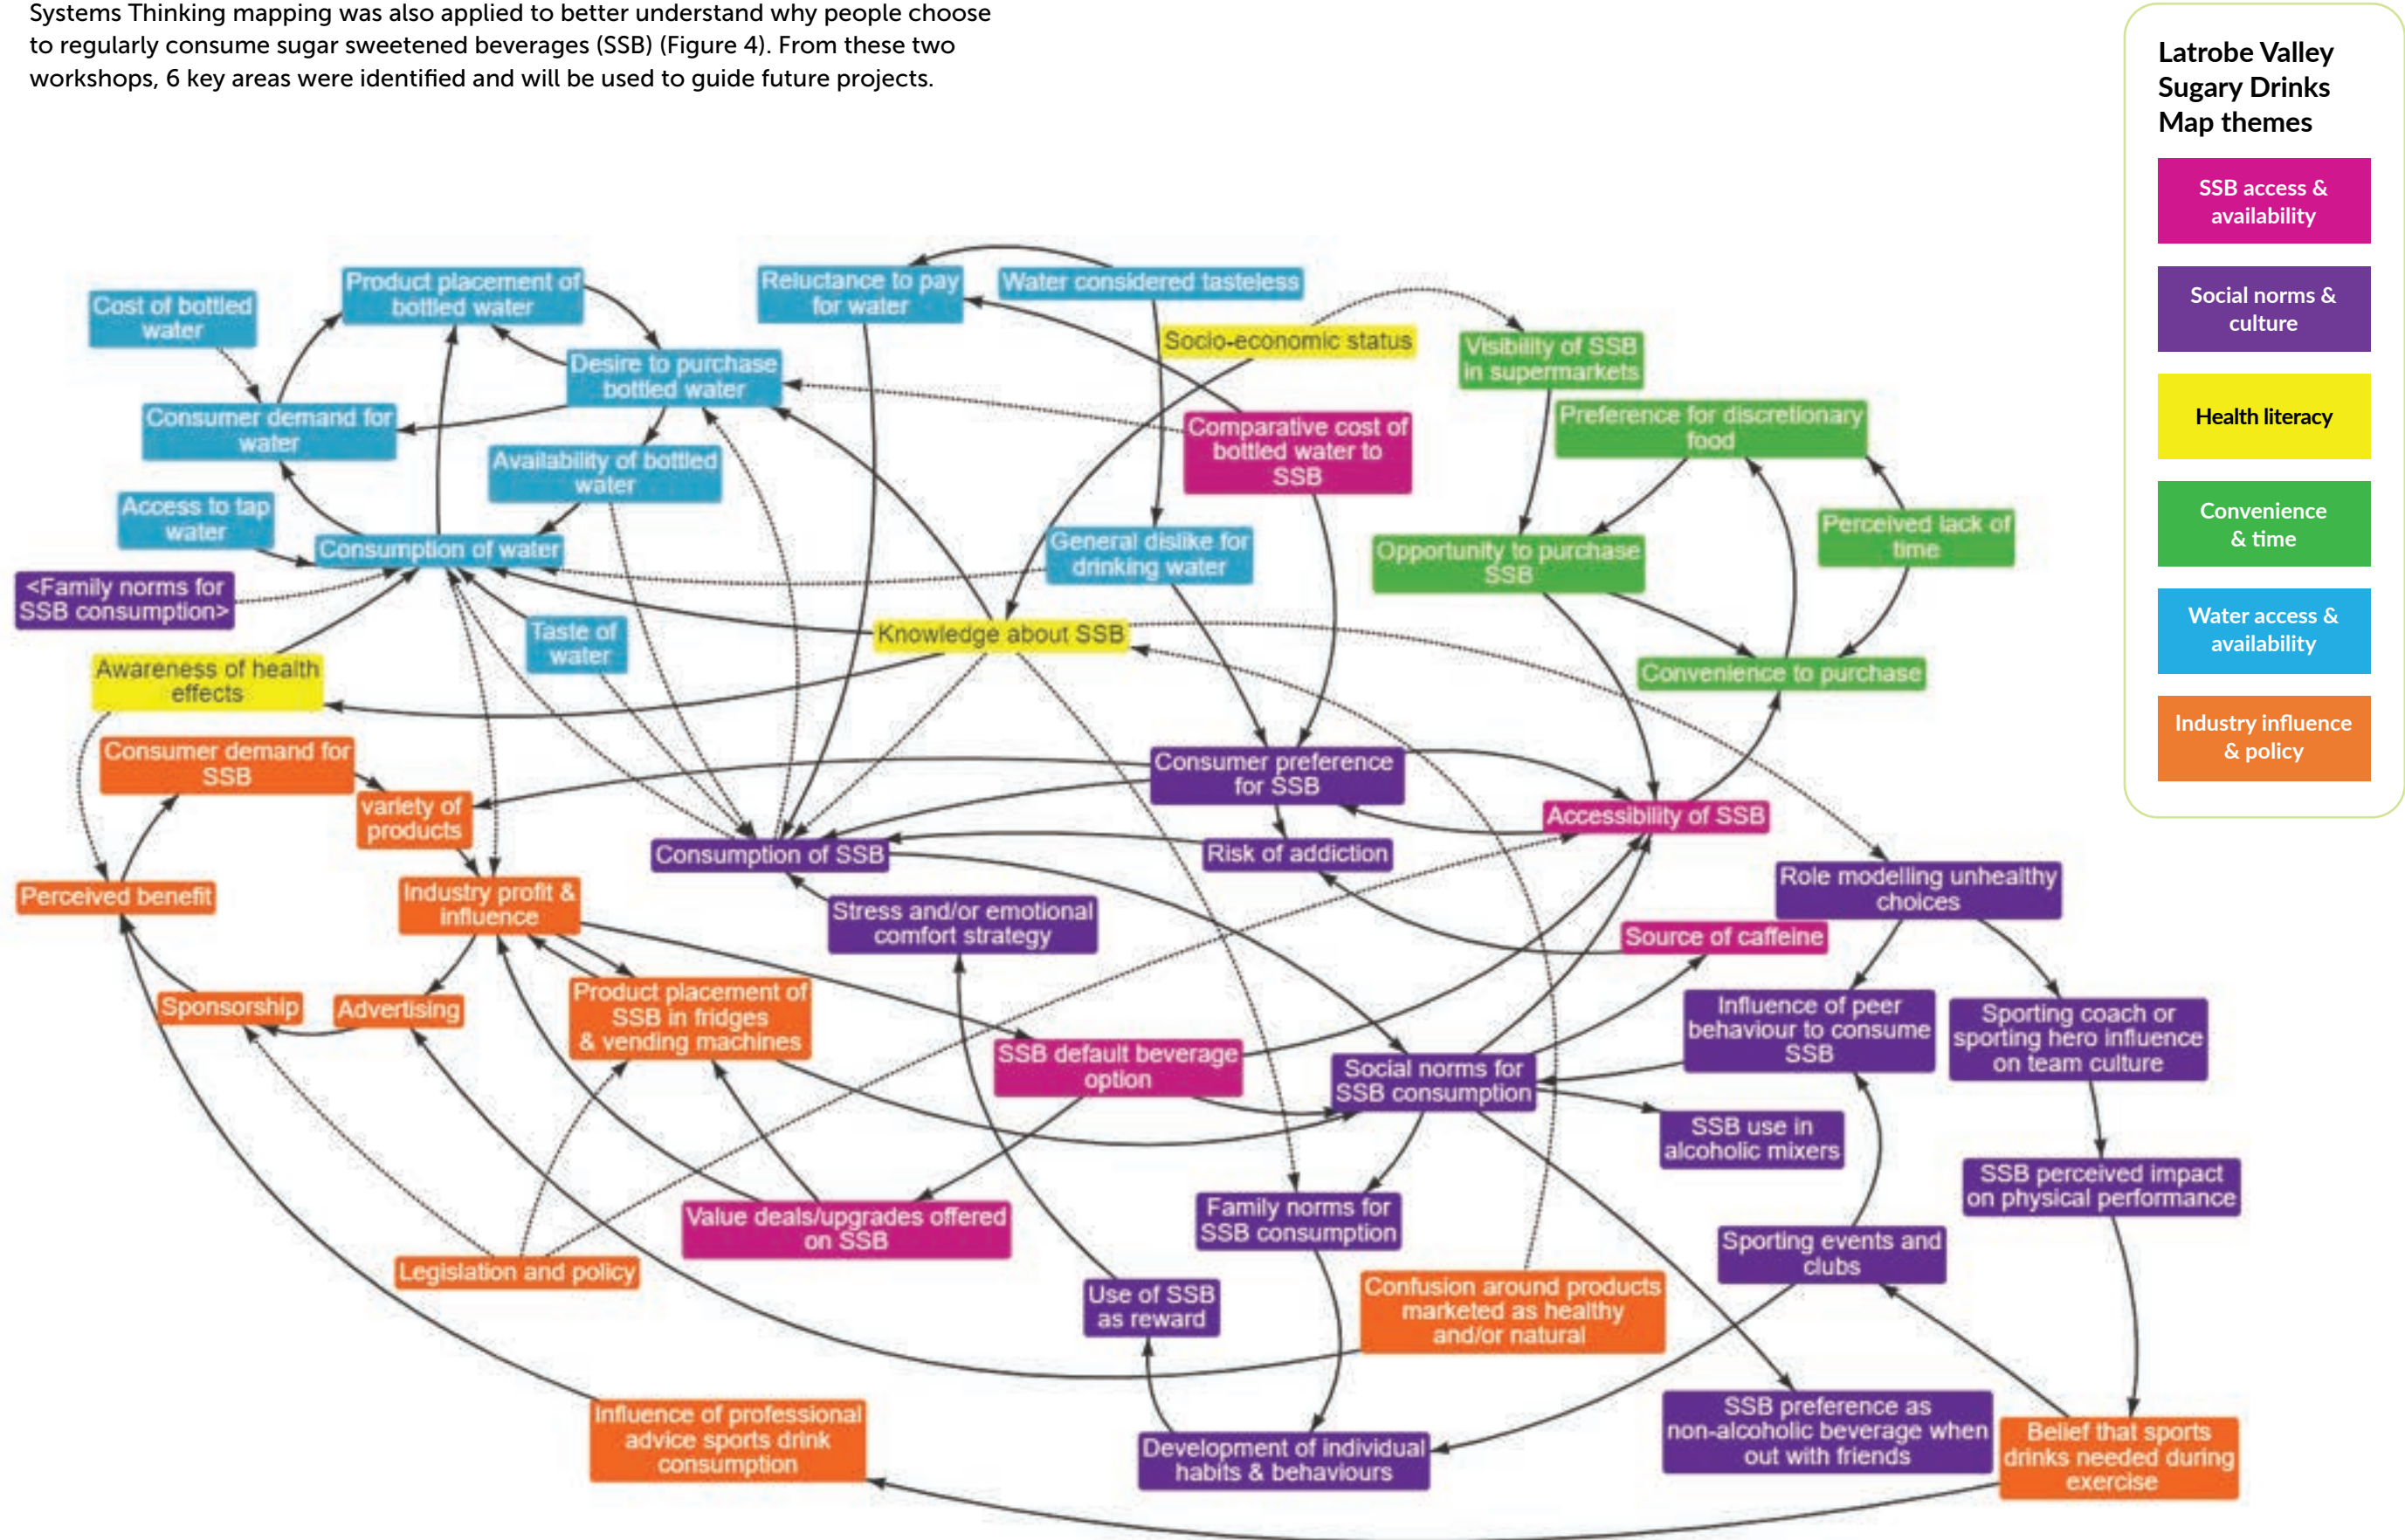

Figure 4: Latrobe Valley Sugary Drinks Map themes

# The Action Plan

Over the past 12 months we have implemented the July 2021 - June 2022 Action Plan which incorporates 40 actions led by 12 different organisations and community members. The full action plan can be accessed under Additional Information on page 29.

The action plan delivers on activities across four objectives:

1. Improve access to, and efficiency of food relief services across Latrobe Valley
2. Increase healthy food preferences and food literacy skills within Latrobe Valley
3. Support local food production and a sustainable food economy
4. Improve community engagement and support capacity building initiatives

## Objective 1:

### **IMPROVE THE ACCESS TO, AND THE EFFICIENCY OF FOOD RELIEF SERVICES ACROSS LATROBE VALLEY**

Through discussions with the community and stakeholders, a key theme was developed concentrating on the local food relief system, and the growing reliance on emergency services for many residents. The conversation focussed on how FFALV could work with the Emergency Relief Network of Latrobe City (ERNLaC) to support a range of actions including; promoting greater awareness of services and locations throughout the community, increased understanding of agency capacity to store and distribute food, and the strengthening of Network partnerships to promote improved efficiency and collaboration across the sector.

## Objective 2:

### **INCREASE HEALTHY FOOD PREFERENCES AND FOOD LITERACY SKILLS WITHIN LATROBE VALLEY**

The second theme to develop throughout the workshops involved recognising the growing preference for, and purchase of unhealthy foods. Together participants worked to brainstorm projects and innovative ideas to address this issue, and identify how we can best respond to this trend and increase the number of people regularly consuming healthy foods.

### Objective 3:

#### **SUPPORT LOCAL FOOD PRODUCTION AND A SUSTAINABLE FOOD ECONOMY**

Increasing access to local produce and developing a vibrant food economy emerged as a strong theme throughout the workshop and consultation process. FFALV aims to promote opportunities that support increasing the number of people creating edible gardens at home, or participating in one of our wonderful local community gardens. By building basic skills and ability, together with greater understanding of the food chain, FFALV aims to promote greater confidence for members of the Latrobe Valley community to grow some of their own food, and develop relationships with local producers.

### Objective 4:

#### **IMPROVE COMMUNITY ENGAGEMENT AND SUPPORT CAPACITY BUILDING ACTIVITIES**

A strong local food system involves a passionate and engaged community that has the skills, confidence and resources needed to not just participate in a range of activities; but to create and implement their own successful outcomes. FFALV is working to improve participation in food related activities and build basic skills to support food related projects through capacity building opportunities, and free or low cost programs. Increased participation in activities further aims to foster greater social connection and knowledge sharing across Latrobe Valley; supporting a cultural shift towards a resilient food system.

# What we have achieved in Year 4

These collective achievements during our fourth year of the initiative demonstrate how FFALV continues to strive to empower residents to make informed food choices; supported by a fair and strong local food system. The outcomes further show that Latrobe Valley residents continue to enjoy participating in food related activities, and in response to the COVID-19 pandemic are increasing their engagement with the local food system through online platforms.

## COLLECTIVE ACHIEVEMENTS IN YEAR 4 (JULY 2021 - JUNE 2022)

**3 new organisations**

and community groups  
engaged in FFALV  
activities

**1,008 people**  
participating in food  
interventions

**15,122 people reached through social media**

**36**  
food  
interventions

**26.7% increase**  
in social media  
following

**6**  
**MONTH**

action plan developed

**12 organisations and**  
**community members**  
leading 40 actions

# Objective 1

## **Achievements: Improve the access to, and the efficiency of food relief services across Latrobe Valley**

### **WHAT HAVE WE DONE?**

- Continued to develop the strong partnership between ERNLaC & FFALV
- Created a partnership between Moe Baptist Church and the Moe Neighbourhood House to provide food parcels to residents in need
- Increased information sharing and ERNLaC brochure distribution across Latrobe
- Worked together with community members and local businesses to increase access to culturally appropriate food within Latrobe Valley

### **Establishment of a new partnership between local emergency relief provider and the Moe Neighbourhood House**

The Moe Neighbourhood House is a central meeting place that supports the local community in many ways, one of which is access to fresh produce through their community garden. An opportunity was identified for dry good hampers to be available for residents in need that were not able to access existing emergency food relief locations. The Neighbourhood House was happy to provide food hampers to the community, however with very limited space available they were unable to store bulk food items on site.

In response to this challenge, Food For All Latrobe Valley supported the establishment of a new partnership between the Moe Neighbourhood House and Moe Baptist Church.

Moe Baptist Church had an existing emergency food relief program and were able to deliver small numbers of food hampers to the Neighbourhood Centre on a weekly basis; eliminating the need for a large storage site. Over 100 food relief hampers have been provided to the Moe Neighbourhood House so far, in addition to a weekly bread box to support local community members in need.

# Objective 1

## LEARNINGS

- The demand for food relief across Latrobe Valley continues to grow, particularly as the cost of living continues to rise. This, combined the COVID-19 pandemic has put added strain on local food relief agencies.
- Increased understanding and awareness of cultural dietary preferences has seen the introduction of halal food parcels in some agencies; though continued support to promote wider implementation is needed to ensure inclusive and appropriate food relief to all members of the Latrobe Valley community.

## KEY ACHIEVEMENTS

### Investigating

local barriers and solutions in partnership with the CALD community to increase access to culturally appropriate foods

### Increased partnerships

to provide greater access to emergency food relief

**2,300+ people**

accessing the **'Farms to Families'** pop up markets

**12,000+ people** accessed food relief through ERNLaC agencies

**278,906 kgs** of food distributed across Latrobe Valley

## Objective 2

### **Achievements: Increase healthy food preferences and food literacy skills within Latrobe Valley**

#### **WHAT HAVE WE DONE?**

- Continued to increase our social media presence, awareness and engagement
- Successfully delivered six 'Mood & Food' workshops across Latrobe, targeting parents and carers of young children
- Supported the development of the 'Healthy Supermarkets Latrobe' project in three local supermarkets
- Continued to monitor healthy food affordability and availability in Latrobe through the Victorian Healthy Food Basket survey
- Developed the Food Share Latrobe project in partnership with Latrobe City Council and Latrobe Youth Space

#### **LEARNINGS**

- Collaborative partnerships remain essential as we work to shift the local food culture towards healthy preferences, particularly when facing the additional challenges brought forward by the COVID-19 pandemic and the rising cost of living
- Supporting a dynamic approach to project implementation and evaluation, and continuing to foster community engagement long term remains vital to effectively respond to complex social issues

#### **Food For All Latrobe Valley in partnership with Latrobe Community Health Service delivered six local 'Mood & Food' workshops**

Food For All Latrobe Valley (FFALV) in partnership with Latrobe Community Health Service delivered six free 'Mood and Food' workshops to the community. The workshops targeted parents and carers of young children. The idea was first developed together with FFALV members and workshops were held in six townships across Latrobe.

The sessions highlighted the link between diet and mental health, and offered simple ways to increase fruit and vegetable intake in children's diets. 24 people participated in the sessions which included either a food growing activity or a healthy snack demonstration. Participants also had access to a community dietician and counsellor. The food growing activities were led by two local community experts. These workshops provided lots of fun for the kids to practice potting their own seeds, learn about soil, and explore the community garden!

# Objective 2

## NEXT STEPS

- Support the implementation of a community food event in partnership with Latrobe City Council and Latrobe Community Health Service
- Latrobe Community Healthy Service will continue to drive the implementation of the Healthy Supermarkets Latrobe project

### Monitoring the cost and availability of healthy food across Latrobe Valley

Food For All Latrobe Valley (FFALV) regularly monitors food security indicators within Latrobe. This helps to understand what factors affect our communities' ability to access fresh, nutritious food.

In the last 12 months, FFALV conducted the Victorian Health Food Basket survey to measure the cost and affordability of healthy food. In December 2021, data was collected from 16 supermarkets and used to measure the cost of 44 common food items.

The findings showed that the a four-person family needs to spend an average of 26% of their total income on food. The findings also showed that families and individuals living outside major town centres need to spend more on healthy food.

This is due to having limited access to the larger chain supermarkets, which are generally cheaper than smaller stores.

Continuing to monitor food security trends will be important data to consider when planning future projects.

## KEY ACHIEVEMENTS

### Collaborative partnerships

established & maintained

### Promoted

community gardens and access to local fresh produce

Food Share Latrobe project developed

### 6 'Mood & Food' workshops

delivered across Latrobe

### 3 supermarkets

participating in the Healthy Supermarkets Latrobe project

## Objective 3

### **Achievements: Support local food production and a sustainable food economy**

#### **WHAT HAVE WE DONE?**

- Continued conversations with local organisations and local government to raise the profile of food security within our community
- Promoted existing initiatives and opportunities that support our core values
- Delivered 11 Sustainable Gardening workshops in partnership with Yinnar Community Garden and Yinnar-Yinnar South Landcare
- Continued to advocate support for the Latrobe Valley Food Declaration
- Supported the planning and development of the Seed Libraries community event (planned September 2022)

#### **LEARNINGS**

- COVID-19 continued to result in barriers to community participation and engagement in activities; innovative solutions and ideas are vital to maintain community interest and commitment
- Continuing to build the capacity of the community is necessary to support self-efficacy and future project implementation

### **Food For All Latrobe Valley supported the development and implementation of the Culturally and Linguistically Diverse Community Food Access project**

Latrobe Valley has a varied and growing culturally and linguistically diverse (CALD) community. The COVID-19 pandemic exposed many CALD residents were not able to buy cultural and traditional food items within Latrobe. In response, the CALD Food Access project was developed in August 2021 in partnership with the Latrobe Health Assembly.

The project aimed to better understand the local challenges faced accessing culturally appropriate foods. The project also aimed to address common myths around cultural practices, such as halal and kosher food preparation.

Over 90 local businesses, community leaders and residents took part and shared their stories. The project was promoted in local newspapers, via social media and radio. A social media campaign featuring 7 local CALD residents was also developed to support Cultural Diversity Week 2022.

# Objective 3

## NEXT STEPS

- Latrobe Community Health Service will continue to promote and gather new signatories on the Food Declaration and grow support for a sustainable local food system

**Food For All Latrobe Valley in partnership with Latrobe Health Assembly have developed the Latrobe Valley Food Declaration.**

[The Declaration](#) is a shared statement outlining our vision for a strong local food system that is safe, secure, fair, sustainable and connected.

The Declaration aims to encourage action to strengthen our local food system and achieve better access to affordable, fresh and nutritious food for everyone in our community. Signatories to the Declaration share a vision of a fair and equitable food system for those who live, work and play in Latrobe Valley.

The Declaration currently has six signatories representing organisations and community initiatives, and over 115 people have viewed the webpage to learn more about the Declaration.

Latrobe Community Health Service will continue to gather new signatories over the next 12 months as a way to raise awareness and commitment to food security from a broad range of stakeholders including; community groups, local organisations, businesses, and local government.

## KEY ACHIEVEMENTS

**2** new signatories to the Latrobe Valley Food Declaration

**One** new community garden site identified

**11**

**sustainable gardening** workshops delivered

**200+** people participating

**local food swaps** across Latrobe Valley

**90+**

people supporting the CALD Food Access project

## Objective 4

### **Achievements: Improve community engagement and support capacity building activities**

#### **WHAT HAVE WE DONE?**

- Increased engagement and reach of key messaging through social media platforms
- Encouraged and supported local food projects that incorporate knowledge sharing and skill building
- Promoted awareness of local food activities including produce markets, workshops and community gardens
- Supported organisations and retailers to implement the Healthy Choices program
- Supported the implementation of the Edible Gardens project in partnership with the Newborough Men's Shed

#### **Increasing skills and knowledge of sustainable food production and native plant conservation**

Over the past 12 months, Food For All Latrobe Valley (FFALV) in partnership with Yinnar Community Garden and Yinnar-Yinnar South Landcare delivered 11 free local community workshops.

The workshops were funded through a Yinnar South Recovery grant in response to the 2019 bush fires.

The workshops ranged from organic food production to increasing biodiversity in the garden. The most popular session focused on Indigenous food, fibre and medicine. The workshops included both an in depth theory session and a practical gardening section.

In total, over 120 people participated in the workshops. Participants enjoyed time in the garden and learnt new skills and ideas to inspire their own gardening journey!

# Objective 4

## LEARNINGS

- A multi-organisation approach continues to remain vital to build capacity and greater interest in food related activities at the population level

## NEXT STEPS

- Latrobe Community Health Service will continue our work to finalise the implementation of the Edible Gardens Project

## KEY ACHIEVEMENTS

11

sustainable gardening workshops delivered

140+ people

receive the bi-monthly newsletter

26.7% increase

in social media following

4 local media promotions

including radio and print

# Local Research Projects

## MONITORING LOCAL FOOD SECURITY

Food For All Latrobe Valley (FFALV) has conducted a number of research projects to assist in monitoring local food security indicators and gain greater understanding into the factors driving food insecurity within our community. Access to these research reports can be found under Additional Information on page 29.

## WHAT HAVE WE DONE in 2021-2022?

- Conducted research into the variable cost and availability of food throughout Latrobe Valley using the Victorian Healthy Food Basket Survey

## NEXT STEPS

- Continue to advocate for the implementation of suitable recommendations based on research outcomes to reduce local barriers to food security

## WHAT WE FOUND:

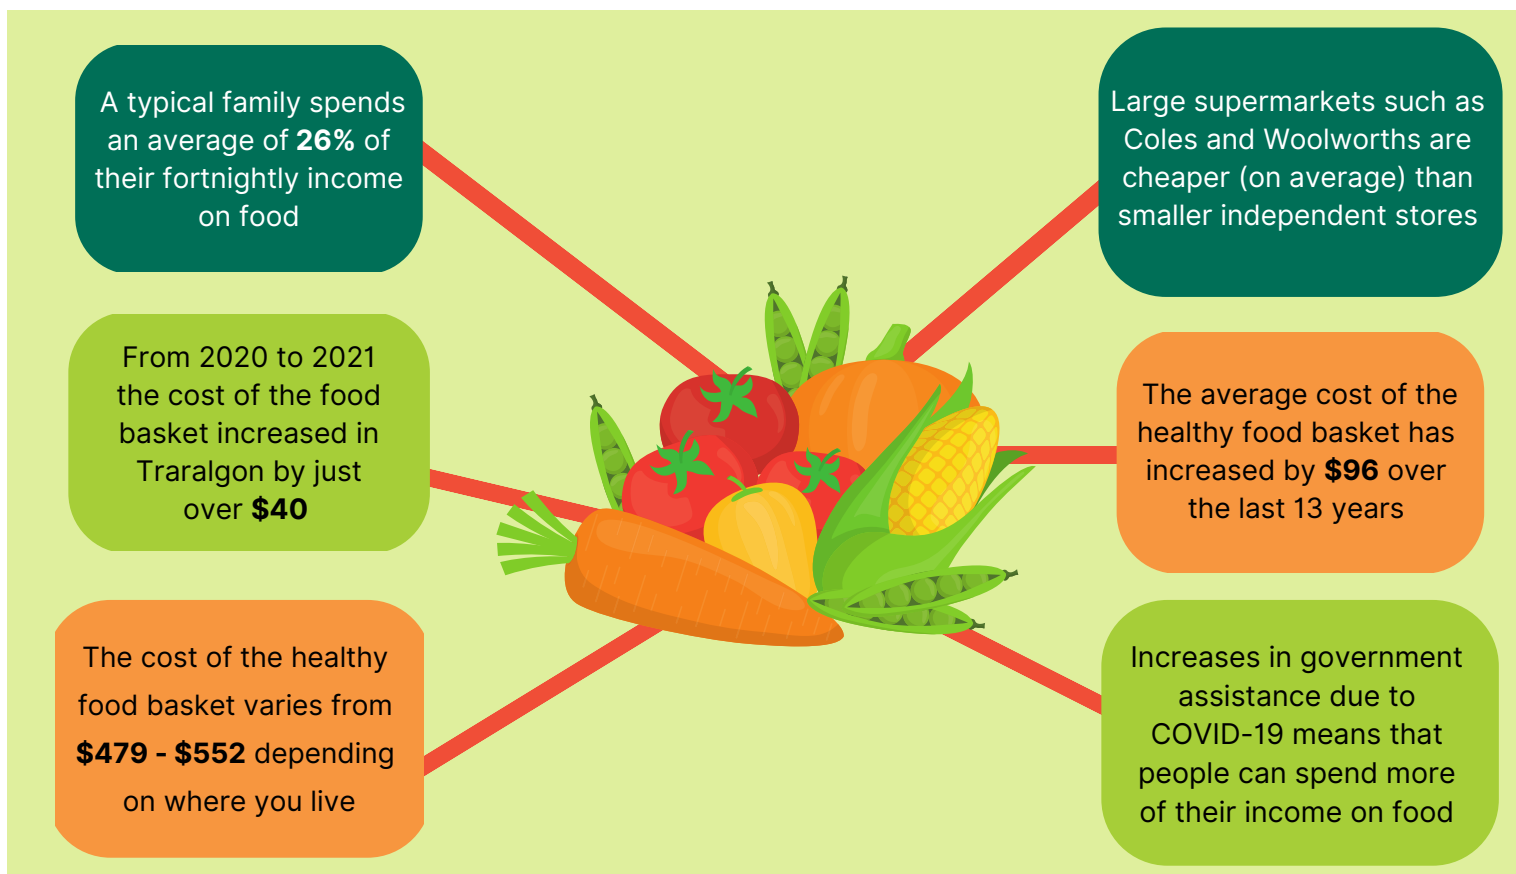

Figure 5. Latrobe Healthy Food Basket Results 2021

# The Next 6 Months

The last 12 months have continued to present ongoing challenges as a result of the COVID-19 pandemic. Yet community interest and engagement in food related activities has continued to grow. As living costs continue to rise and the fractures in the global food system become more evident, it is vital to support the development of strong, resilient local food systems to support healthy, food secure communities.

Over the past year FFALV has delivered many community workshops, supported new food projects and continued to develop new strategic partnerships. Though it has been a difficult time, the passion and resilience of our local community has continued to drive positive change within the food system.

With project funding coming to an end, we are working to identify sustainable options to continue our important work into the future. Thank you to all who have been involved with FFALV over the last four years. Your support has promoted increased awareness of food insecurity within our community, and contributed to positive and collective action within the local food system.

*"By working together we can bring about change to improve food security for our community" - FFALV*
